See prospectus for Class I and R share requirements.

Characteristics

Total net assets	\$122.97 million
Number of holdings	96

The Barclays Capital Intermediate Government/Credit Index represents the intermediate component of the U.S. Government/Credit Index. The Government/Credit Index includes securities in the Government and Credit Indices. The Government Index includes treasuries (i.e., public obligations of the U.S. Treasury that have remaining maturities of more than one year) and agencies (i.e., publicly issued debt of U.S. Government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. Government). The Credit Index includes publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements. It is not possible to invest in an index.

Management

James C. Camp, CFA

Managing Director of Eagle Asset Management's fixed income strategies and portfolio co-manager of the fund, Camp has 23 years of investment experience as a portfolio manager and analyst. He joined Eagle in 1997. Camp received a BS from Vanderbilt University and an MBA from Emory University. He earned his Chartered Financial Analyst designation in 1993.

Joseph Jackson, CFA

Head of corporate bond research and portfolio co-manager of the fund, Jackson has 13 years of investment experience as a portfolio manager and analyst. He joined Eagle in 2004. Jackson received his BA and MBA from Wake Forest University. He earned his Chartered Financial Analyst designation in 2000.

Strategy

- I The fund's managers strive to deliver stable monthly income and protect the safety of investors' principal.
- I The team's process combines top-down analysis of the overall economic and market environment with bottom-up scrutiny to find individual issues that they believe will perform well in all types of markets if their top-down thesis is validated.
- I Target securities include U.S. Treasury and government agency bonds, corporate bonds, mortgage-backed and asset-backed securities. The portfolio may include a limited percentage of foreign bonds; generally these will be U.S. dollar denominated index-eligible issues. Average portfolio duration of two to seven years based on economic and market conditions.¹

Goals

- I Stable monthly income from a diversified portfolio of high-credit-quality² securities that we believe offer returns similar to longer-duration bonds¹ with considerably less risk
- I Provide diversification benefits that may help reduce overall risk in a well-balanced portfolio
- I Alpha generation through strategic use of proprietary analysis to value opportunistic features, identify undervalued securities and cultivate potential for excess return

Class R-5	5.68	5.68	5.09	3/1/10

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance at offer reflects a front-end sales charge of 3.75 percent for Class A shares; a contingent deferred sales charge of 1 percent for Class C share redemptions made earlier than one year after purchase. The Fund's investment adviser, Eagle Asset Management, Inc., has contractually agreed to waive or reimburse certain fees and expenses through Feb. 28, 2012. Performance data quoted reflects reinvested dividends and capital gains. Returns of less than one year are not annualized. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800.421.4184 or visiting eagleasset.com.

Performance "at NAV" assumes that no front-end sales charge applied or the investment was not redeemed. Performance "at offer" assumes that a front-end sales charge applied to the extent applicable.

Class I and R shares are only available to certain investors. See the prospectus for more information.

Please consider the investment objectives, risks, charges, and expenses of any fund carefully before investing. Contact Eagle at 800.421.4184 or your financial advisor for a prospectus, which contains this and other important information about the funds. Read the prospectus carefully before you invest or send money.

Investing in bonds involves risks that may adversely affect the value of your investment such as inflation risk, credit risk, call risk, interest rate risk and liquidity risk, among others. There are many factors which may affect the risk and return profile of a fixed income portfolio. The two most prominent factors are interest rate movements and the credit worthiness of the bond issuer. Investors should pay careful attention to the types of fixed income securities which comprise their portfolios and remember that, as with all investments, there is the risk of loss of capital.

¹Duration incorporates a bond's yield, coupon, final maturity and call features into one number, expressed in years, that indicates how price-sensitive a bond or portfolio is to changes in interest rates. Bonds with higher durations carry more risk and have higher price volatility than bonds with lower durations.

²Credit quality is a measure of creditworthiness of the issuing organization that reflects the likelihood that it will be able to pay its debt (credit risk). Investment grade refers to securities rated [BBB-] or better by Standard & Poor's Rating Services or an equivalent rating by at least one other nationally recognized statistical rating organization or, for unrated securities, those that are determined to be of equivalent quality by the fund's portfolio managers.
