Investment objective | The Eagle Capital Appreciation Fund ("Capital Appreciation Fund" or the "fund") seeks long-term capital appreciation.

Fees and expenses | The tables that follow describe the fees and expenses that you may pay if you buy and hold shares of the Capital Appreciation Fund. You may qualify for sales discounts if you and your family invest, or agree to invest in the future, at least \$25,000 in the Class A shares of the Eagle Family of Funds. More information about these and other discounts is available from your financial professional, on page 36 of the fund's prospectus and on page 25 of the fund's statement of additional information.

(a) If you purchased \$1,000,000 or more of Class A shares of an Eagle mutual fund that were not otherwise eligible for a sales charge waiver and sell the shares within 18 months from the date of purchase, you may pay up to a 1% contingent deferred sales charge at the time of sale. (b) As the fund's asset levels change, the fund's fees and expenses may differ from those reflected in the preceding table. For example, as asset levels decline, expense ratios may increase. Eagle Asset Management, Inc. ("Eagle") has contractually agreed to cap its investment advisory fee and/or reimburse certain expenses of the fund to the extent that annual operating expenses of each class exceed a percentage of that class' average daily net assets through February 28, 2011 as follows: Class A - 1.40%, Class C - 2.20%, Class I - 0.95%, Class R-3 - 1.65%, and Class R-5 - 0.95%. This expense limitation excludes interest, taxes, brokerage commissions, costs relating to investments in other investment companies, dividends, extraordinary expenses and includes offset expense arrangements with the fund's custodian. The Board

of Trustees may agree to change fee limitations or reimbursements without the approval of fund shareholders. Any reimbursement of fund expenses or reduction in Eagle's investment advisory fees is subject to reimbursement by the fund within the following two fiscal years and any additional periods, if overall expenses fall below the lesser of its then current expense cap or the expense cap in effect at the time of the fund reimbursement.

Expense example | This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share class	Year 1	Year 3	Year 5	Year 10
Class A	\$603	\$873	\$1,164	\$1,990
Class C	\$211	\$652	\$1,119	\$2,410
Class I	\$96	\$300	\$520	\$1,155
Class R-3	\$152	\$471	\$813	\$1,779
Class R-5	\$89	\$278	\$482	\$1,073

Portfolio turnover | The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 54% of the average value of its portfolio.

Principal investment strategies | During normal market conditions, the Capital Appreciation Fund seeks to achieve its objective by investing at least 65% of its net assets in common stocks of companies that have the potential for attractive long-term growth in earnings, cash flow and total worth of the company. In addition, the portfolio management team prefers to purchase stocks that appear to be undervalued in relation to the company's long-term growth fundamentals. The primary focus of the fund's portfolio management team is the analysis of individual companies rather than the industry in which that company operates or the economy as a whole. The fund invests in the stocks of companies of any size without regard to market capitalization and will sell securities when they no longer meet the portfolio management team's investment criteria. Although the fund is diversified, it normally will hold a core portfolio of stocks of fewer companies than many other diversified funds.

Eagle Capital Appreciation Fund

SUMMARY PROSPECTUS | 3.1.2010 AS AMENDED 9.13.2010

Principal risks | The greatest risk of investing in this fund is that you could lose money. The fund invests primarily in common stocks whose values increase and decrease in response to the activities of the companies that issued such stocks, general market conditions and/or economic conditions. As a result, the fund's net asset value ("NAV") also increases and decreases. Investments in this fund are subject to the following primary risks and these risks are further explained in "Additional Information About Risk Factors":

- Focused holdings risk is the risk of a fund holding a core portfolio of stocks of fewer companies than other diversified funds;
- Growth stock risk is the risk of a lack of earnings increase or lack of dividend yield;
- Sector risk is the risk of a fund holding a core portfolio of stocks invested in similar businesses which could all be affected by the same economic or market conditions;
- Small- and mid-cap company risk arises because small- and mid-cap companies may have narrower commercial markets, less liquidity and less financial resources than large-cap companies; and
- Stock market risk is the risk of broad stock market decline or decline in particular holdings.
