WITH THE PROSPECTUS FOR FUTURE REFERENCE**

SUP-SPRO-MMEAGLE-112

JPMorgan Tax Free Money Market Fund – Eagle Class

Ticker: JTEXX

Before you invest, you may want to review the Fund’s Prospectus, which contains more information about the Fund and its risks. You can find the Fund’s Prospectus and other information about the Fund, including the Statement of Additional Information, online at <http://www.eagleasset.com/prospectus.htm>. You can also get this information at no cost by calling 1-800-421-4184 or by sending an e-mail request to EagleFundServices@eagleasset.com or by asking any financial intermediary that offers shares of the Fund. The Fund’s Prospectus and Statement of Additional Information, both dated July 1, 2011, are incorporated by reference into this Summary Prospectus.

The Fund’s Objective

The Fund aims to provide the highest possible level of current income which is excluded from gross income, while still preserving capital and maintaining liquidity.

Fees and Expenses of the Fund

The following table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

ANNUAL FUND OPERATING EXPENSES (Expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.08%
Distribution (Rule 12b-1) Fees	0.25
Other Expenses	0.54
Shareholder Service Fees	0.30
Remainder of Other Expenses	0.24
Total Annual Fund Operating Expenses	0.87
Fee Waivers and Expense Reimbursements¹	<u>(0.17)</u>
Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements¹	0.70

¹ The Fund’s adviser, administrator and distributor (the Service Providers) have contractually agreed to waive fees and/or reimburse expenses to the extent Total Annual Fund Operating Expenses of Eagle Class Shares (excluding acquired fund fees and expenses, dividend expenses relating to short sales, interest, taxes and extraordinary expenses and expenses related to the Board of Trustees’ deferred compensation plan) exceed 0.70% of their average daily net assets. This contract cannot be terminated prior to 7/1/12, at which time the Service Providers will determine whether or not to renew or revise it.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses are equal to the total annual fund operating expenses after fee waivers and expense reimbursements shown in the fee table through 6/30/12 and total annual fund operating expenses thereafter. Your actual costs may be higher or lower.

WHETHER OR NOT YOU SELL YOUR SHARES, YOUR COST WOULD BE:

	1 Year	3 Years	5 Years	10 Years
EAGLE CLASS SHARES (\$)	72	261	466	1,057

The Fund’s Main Investment Strategy

Under normal conditions, the Fund will try to invest its assets exclusively in municipal obligations, the interest on which is excluded from federal income taxes. As a fundamental policy, the Fund will invest at least 80% of the value of its Assets in municipal obligations. For purposes of this policy, “Assets” means net assets, plus the amount of borrowings for investment purposes.

Municipal obligations are securities that:

- are issued by or on behalf of states, territories and possessions of the United States, including the District of Columbia, and their respective authorities, agencies and other groups with authority to act for the municipalities; and
- are short-term money market instruments such as private activity and industrial development bonds, tax anticipation notes, municipal lease obligations and participations in pools of municipal obligations (the Fund will only purchase municipal obligations if the issuer receives assurances from legal counsel that the interest payable on the securities is exempt from federal income tax).

The remaining 20% of the Fund’s total assets may be invested in securities subject to federal income tax or the federal alternative minimum tax.

The Fund is a money market fund managed in the following manner:

- The Fund seeks to maintain a net asset value of \$1.00 per share.
- The dollar-weighted average maturity of the Fund will be 60 days or less and the dollar-weighted average life to maturity will be 120 days or less.
- The Fund will only buy securities that have remaining maturities of 397 days or less or securities otherwise permitted to be purchased because of maturity shortening provisions under applicable regulation.
- The Fund invests only in U.S. dollar-denominated securities.
- The Fund will only buy securities that present minimal credit risk.

The Fund may invest significantly in securities with floating or variable rates of interest. Their yields will vary as interest rates change.

The Fund's adviser seeks to develop an appropriate portfolio by considering the differences in yields among securities of different maturities, market sectors and issuers.

The Fund's Main Investment Risks

The Fund is subject to management risk and the Fund may not achieve its objective if the adviser's expectations regarding particular securities or interest rates are not met.

An investment in this Fund or any other fund may not provide a complete investment program. The suitability of an investment in the Fund should be considered based on the investment objective, strategies and risks described in this Prospectus, considered in light of all of the other investments in your portfolio, as well as your risk tolerance, financial goals and time horizons. You may want to consult with a financial advisor to determine if this Fund is suitable for you.

Interest Rate Risk. Changes in short-term interest rates will cause changes to the Fund's yield. In addition, a low-interest rate environment may prevent the Fund from providing a positive yield or maintaining a stable net asset value of \$1.00 per share.

Credit Risk. The Fund's investments are subject to the risk that the issuer or the counterparty will fail to make payments when due or default completely. If an issuer's financial condition worsens, the credit quality of the issuer may deteriorate making it difficult for the Fund to sell such investments.

Municipal Obligations Risk. The risk of a municipal obligation generally depends on the financial and credit status of the issuer. Changes in a municipality's financial health may make it difficult for the municipality to make interest and principal payments when due. This could decrease the Fund's income or hurt the ability to preserve capital and liquidity.

Under some circumstances, municipal obligations might not pay interest unless the state legislature or municipality authorizes money for that purpose. Some obligations, including municipal lease obligations, carry additional risks.

Municipal obligations may be more susceptible to downgrades or defaults during recessions or similar periods of economic stress. In addition, since some municipal obligations may be secured or guaranteed by banks and other institutions, the risk to the Fund could increase if the banking or financial sector suffers an economic downturn and/or if the credit ratings of the institutions issuing the guarantee are downgraded or at risk of being downgraded by a national rating organization. Such a downward revision or risk of being downgraded may have an adverse effect on the market prices of the obligations and thus

the value of the Fund's investments. To the extent that the financial institutions securing the municipal obligations are located outside the U.S., these securities could be riskier than those backed by U.S. institutions because of possible political, social or economic instability, higher transaction costs, currency fluctuations, and possible delayed settlement.

In addition to being downgraded, an insolvent municipality may file for bankruptcy. The reorganization of a municipality's debts may significantly affect the rights of creditors and the value of the obligations issued by the municipality and the value of the Fund's investments.

There may be times that, in the opinion of the adviser, municipal money market securities of sufficient quality are not available for the Fund to be able to invest in accordance with its normal investment policies. As a temporary defensive position, the adviser may invest any portion of the Fund's assets in obligations subject to federal income tax, or may hold any portion of the Fund's assets in cash.

Tax Risk. The Fund may invest in securities whose interest is subject to federal income tax or the federal alternative minimum tax.

Redemption Risk. The Fund may need to sell its holdings in order to meet shareholder redemption requests. The Fund could experience a loss when selling securities to meet redemption requests if the redemption requests are unusually large or frequent, occur in times of overall market turmoil or declining prices for the securities sold, or when the securities the Fund wishes to or is required to sell are illiquid.

Floating and Variable Rate Securities Risk. Floating and variable rate securities provide for a periodic adjustment in the interest rate paid on the securities. The rate adjustment intervals may be regular and range from daily up to annually, or may be based on an event, such as a change in the prime rate. Floating and variable rate securities may be subject to greater liquidity risk than other debt securities, meaning that there may be limitations on the Fund's ability to sell the securities at any given time. Such securities also may lose value.

Net Asset Value Risk. There is no assurance that the Fund will meet its investment objective of maintaining a net asset value of \$1.00 per share on a continuous basis. Furthermore, there can be no assurance that the Fund's affiliates will purchase distressed assets from the Fund, make capital infusions, enter into capital support agreements or take other actions to ensure that the Fund maintains a net asset value of \$1.00 per share. In the event any money market fund fails to maintain a stable net asset value, other money market funds, including the Fund, could face a universal risk of increased redemption pressures, potentially jeopardizing the stability of their net asset values. In general, certain other money market funds have in the past failed to maintain stable net asset values and there can be no

assurance that such failures and resulting redemption pressures will not occur in the future.

Risk Associated with the Fund Holding Cash. Although the Fund seeks to be fully invested, it may at times hold some of its assets in cash, which may hurt the Fund's performance.

Risk of Regulation of Money Market Funds. The Securities and Exchange Commission (SEC) has recently adopted amendments to money market regulation, imposing new liquidity, credit quality, and maturity requirements on all money market funds. These changes may result in reduced yields achieved by certain money market funds. The SEC may adopt additional reforms to money market regulation, which may impact the operation or performance of the Fund.

Investments in the Fund are not deposits or obligations of, or guaranteed or endorsed by, any bank and are not insured or guaranteed by the FDIC, the Federal Reserve Board or any other government agency. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Fund.

The Fund's Past Performance

This section provides some indication of the risks of investing in the Fund. Because the Eagle Class Shares have not yet operated for a full calendar year, the bar chart shows how the performance of the Fund's Reserve Shares has varied from year to year over the past ten calendar years. The table shows the average annual total returns for the past one year, five years and ten years. The performance of Eagle Class Shares is based on the performance of Reserve Shares and Morgan Shares prior to the inception of the Eagle Class Shares. The actual returns of Eagle Class Shares would have been different than those shown because Eagle Class Shares have different expenses than Reserve Shares and Morgan Shares.

To obtain current yield information call 1-800-421-4184 or visit eagleasset.com. Past performance is not necessarily an indication of how the Fund will perform in the future.

Best Quarter	2nd quarter, 2007	0.77%
	3rd quarter, 2007	
Worst Quarter	2nd quarter, 2009	0.00%
	3rd quarter, 2009	
	4th quarter, 2009	
	1st quarter, 2010	

The Fund's year-to-date total return as of 3/31/11 was 0.00%.

AVERAGE ANNUAL TOTAL RETURNS (For periods ended December 31, 2010)			
	Past 1 Year	Past 5 Years	Past 10 Years

- Through your Financial Intermediary
- By writing to Eagle Fund Services, Inc., P.O. Box 5354, Cincinnati, OH 45201
- After you open an account, by calling Eagle Fund Services, Inc. at 1-800-421-4184

Tax Information

The Fund's distributions of interest on municipal obligations generally are not subject to federal income tax; however the Fund may distribute taxable dividends, including distributions of short-term capital gains, and long-term capital gains. In addition, interest on certain obligations may be subject to the federal alternative minimum tax. To the extent that the Fund's distributions are derived from interest on obligations that are not exempt from applicable state and local taxes, such distributions will be subject to such state and local taxes.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary, including Eagle, such as a bank, the Fund and its related companies may pay the financial intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
