**Investment objective** | The Eagle Small Cap Core Value Fund ("Small Cap Core Value Fund" or the "fund") seeks capital growth.

**Fees and expenses** | The tables that follow describe the fees and expenses that you may pay if you buy and hold shares of the Small Cap Core Value Fund. You may qualify for sales discounts if you and your family invest, or agree to invest in the future, at least \$25,000 in the Class A shares of the Eagle Family of Funds. More information about these and other discounts is available from your financial professional, on page 36 of the fund's prospectus and on page 25 of the fund's statement of additional information.

(a) If you purchased \$1,000,000 or more of Class A shares of an Eagle mutual fund that were not otherwise eligible for a sales charge waiver and sell the shares within 18 months from the date of purchase, you may pay up to a 1% contingent deferred sales charge at the time of sale. (b) Acquired Fund Fees and Expenses are fees incurred indirectly by the fund as a result of investment in certain pooled

investment vehicles, such as mutual funds. (c) As the fund's asset levels change, the fund's fees and expenses may differ from those reflected in the preceding table. For example, as asset levels decline, expense ratios may increase. Eagle Asset Management, Inc. ("Eagle") has contractually agreed to cap its investment advisory fee and/or reimburse certain expenses of the fund to the extent that annual operating expenses of each class exceed a percentage of that class' average daily net assets through February 28, 2011 as follows: Class A - 1.50%, Class C - 2.30%, Class I - 0.95%, Class R-3 - 1.70%, and Class R-5 - 0.95%. This expense limitation excludes interest, taxes, brokerage commissions, costs relating to investments in other investment companies, dividends, extraordinary expenses and includes offset expense arrangements with the fund's custodian. The Board of Trustees may agree to change fee limitations or reimbursements without the approval of fund shareholders. Any reimbursement of fund expenses or reduction in Eagle's investment advisory fees is subject to reimbursement by the fund within the following two fiscal years and any additional periods, if overall expenses fall below the lesser of its then current expense cap or the expense cap in effect at the time of the fund reimbursement.

**Expense example** | This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Share Class	Year 1	Year 3	Year 5	Year 10
Class A	\$618	\$1,520	\$2,429	\$4,739
Class C	\$231	\$1,334	\$2,429	\$5,127
Class I	\$97	\$488	\$904	\$2,066
Class R-3	\$173	\$1,166	\$2,164	\$4,676
Class R-5	\$97	\$488	\$904	\$2,066

**Portfolio Turnover** | The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 23% of the average value of its portfolio.

**Principal investment strategies** | During normal market conditions, the Small Cap Core Value Fund seeks to achieve its objective by investing at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in the equity securities of small-capitalization companies. The fund's portfolio managers consider small-capitalization companies to be those companies that, at the time of initial purchase,

have a market capitalization equal to or less than the largest company in the Russell 2000® Index during the most recent 12-month period (approximately \$5.6 billion during the 12-month period ended December 31, 2009).

The fund's portfolio managers use a value approach to select the fund's investments. Using this investment style, the portfolio managers seek securities selling at discounts to their underlying values and then hold these securities until the market values reflect their intrinsic values. Factors that the portfolio managers look for in selecting investments include: (1) favorable expected returns relative to perceived risk; (2) management with demonstrated ability and commitment to the company; (3) above average potential for earnings and revenue growth; (4) low market valuations relative to forecasted earnings, book value, cash flow and sales; (5) turnaround potential for companies that have been through difficult periods; (6) low debt levels relative to total capitalization; and (7) strong industry fundamentals, such as increasing or sustainable demand and barriers to entry. The fund may sell securities for a variety of reasons, such as to secure gains, limit losses, or redeploy assets into more promising opportunities.

**Principal risks** | The greatest risk of investing in this fund is that you could lose money. The fund invests primarily in common stocks whose values increase and decrease in response to the activities of the companies that issued such stocks, general market conditions and/or economic conditions. As a result, the fund's net asset value ("NAV") also increases and decreases. Investments in this fund are subject to the following primary risks and these risks are further explained in "Additional Information About Risk Factors":

- Growth stock risk is the risk of a lack of earnings increase or lack of dividend yield;
- Market timing risk arises because a fund's value may be affected by market timing, especially in small-cap securities;
- Investing in other investment companies and exchange-traded funds ("ETFs") carries with it the risk that by investing in another investment company or ETF the fund, and therefore its shareholders, indirectly bear the fund's proportionate share of the fees and expenses paid by shareholders of the other investment company or ETF, in addition to the fees and expenses fund shareholders directly bear in connection with the fund's own operations;
- Small- and mid-cap company risk arises because small- and mid-cap companies may have narrower commercial markets, less liquidity and less financial resources than large-cap companies;
- Stock market risk is the risk of broad stock market decline or decline in particular holdings; and
- Value stock risk arises from the possibility that a stock's true value may not be fully realized by the market.
