

MISSION STATEMENT

“ Our team believes a deliberate emphasis on **Environmental, Social, and Governance (ESG) factors**, as part of the investment process, can have a positive impact on the entities we invest in, the communities they represent, and risk-adjusted returns for our clients. By broadening the scope of traditional analysis and **examining ESG risks and opportunities**, we aim to identify bond issuers that are operating in a sustainable manner today and preparing for material issues that may affect them in the future. ”
